

MORTAL KOMBAT (1992)

PAGE 1 - PLAYABLE CHARACTERS: SPECIAL MOVES + FATALITY ONLY

JOHNNY CAGE

Green Bolt - B, F, LP
Shadow Kick - B, F, LK
Ball Breaker - BL + LP

Fatality - F, F, F, HP | CLOSE

KANO

Cannonball / Spin Attack - rotate joystick 360 degrees
Knife Throw - Hold BL, B, F

Fatality - B, D, F, LP | CLOSE

RAIDEN

Teleport - D, U
Lightning Bolt - D, F, LP
Flying Thunderbolt / Torpedo - B, B, F

Fatality - F, B, B, B, HP | CLOSE

LIU KANG

Fireball - F, F, HP
Flying Kick - F, F, HK

Fatality - rotate joystick 360 degrees counter-clockwise | ANYWHERE

SCORPION

Spear - B, B, LP
Teleport Punch - D, B, HP

Fatality - Hold BL, U, U; release BL | SWEEP

SUB-ZERO

Ice Freeze - D, F, LP
Slide - B + LP + LK + BL simultaneously

Fatality - F, D, F, HP | CLOSE

SONYA BLADE

Energy Ring - B, B, LP
Square Wave Punch - F, B, LP
Leg Grab - D + LP + LK + BL simultaneously

Fatality - F, F, B, B, BL | ANYWHERE

Notation: F = toward opponent | B = away | U = up | D = down | HP/LP = high/low punch | HK/LK = high/low kick | BL = block. Fatality ranges: CLOSE = touching distance; SWEEP = roughly sweep distance.

MORTAL KOMBAT (1992)

PAGE 2 - COMBO THEORY & JUGGLES

HOW MK1 COMBOS WORK

There are no dial-a-combos. MK1 damage comes from airborne hits, anti-air punches, launch height, special-move catches and corner positioning. The key is to hit the opponent while airborne, recover first, then catch them again before they land.

CORE JUGGLE NOTATION

JP = jumping punch | **JK** = jumping kick | **aaHP** = anti-air High Punch | **RH** = Roundhouse (B+HK) | **Uppercut** = D+HP. An **aaHPx2** means two anti-air HP catches before the finisher.

UNIVERSAL THEORY

- 1. Jump Kick -> Special:** The simplest MK1 juggle. Land a JK high enough that your character recovers before the opponent lands, then immediately use a traveling special.
- 2. Anti-air HP chains:** Catch a jump with aaHP; depending on height/character, a second aaHP can connect before the special finisher.
- 3. Corner extensions:** The wall prevents normal pushback, allowing extra JP/JK/RH hits before the finisher.
- 4. Height matters:** Earlier/higher catches give more time for another hit. Late hits often require going directly to the special.
- 5. Revision matters:** Older arcade revisions contain infinities and oddities removed or altered in later revisions. These examples are practical juggle concepts, not an infinite-combo catalog.

PRACTICAL CHARACTER JUGGLES

JOHNNY CAGE

JK -> Shadow Kick (B,F,LK)

aaHP -> aaHP -> Shadow Kick

Corner: Uppercut -> JP/JK -> Shadow Kick or RH

LIU KANG

JK -> Flying Kick (F,F,HK)

aaHP -> aaHP -> Flying Kick

aaHP -> Fireball (F,F,HP) -> Flying Kick

RAIDEN

JK -> Torpedo (B,B,F)

aaHP -> aaHP -> Torpedo

Corner: Uppercut -> JP -> aaHP -> Torpedo

SCORPION

aaHP -> aaHP -> Spear (B,B,LP) -> Uppercut

JK -> Spear -> Uppercut

Teleport Punch (D,B,HP) -> Spear -> Uppercut

SUB-ZERO

Freeze (D,F,LP) -> jump-in / aaHP setup -> follow-up

The Freeze is less about raw combo count and more about guaranteeing the next launcher or positioning the opponent for a corner sequence.

KANO / SONYA

Both rely more on universal airborne/anti-air sequences and their special-move knockdowns than on long, stable midscreen juggles. Use aaHP/JK height and corner position first; finish with Cannonball for Kano or use Sonya's Leg Grab / Square Wave pressure when the spacing allows.

THE ONE RULE TO REMEMBER

Launch them high, recover before they do, and hit them again before they touch the floor. MK1's combo system is timing and position - not memorized strings.
