MORTAL KOMBAT II (1993)

PAGE 2 - COMBO THEORY & JUGGLES

HOW MKII COMBOS WORK

No dial-a-combos. MKII damage is built from launch/stun states, deep jump kicks, anti-air HP, projectiles, air specials and corner re-juggles. Hit them high enough that you recover first, then catch them again before they land.

UNIVERSAL THEORY

Deep JK -> special: land a late JK, recover first, buffer the special as you touch down. **aaHP:** a high anti-air HP can lead to another HP, projectile or traveling special. **Float/freeze:** Kitana Fan Lift and Sub-Zero Ice Ball let you choose exact juggle height. **Corner:** reduced pushback enables extra jump attacks/re-juggles. **Air projectiles:** Kitana, Mileena and Liu Kang can extend aerial pressure. **Revision note:** infinite behavior varies by arcade revision; these are practical patterns.

PRACTICAL JUGGLES

KITANA - Fan Lift (B,B,B,HP) -> JK -> Fan Throw (F,F,HP+LP). Corner: Fan Lift -> neutral JK -> immediate forward JK -> air Fan Throw.
MILEENA - Deep JK -> Teleport Kick (F,F,LK). Corner/air: JK -> air Sai (hold HP 2 sec, release). Roll (B,B,D,HK) supplies knockdown positioning for another jump-in.
SCORPION - aaHP -> Spear (B,B,LP) -> Uppercut (D+HP). Deep JK -> Spear -> Uppercut.
SUB-ZERO - Ice Ball (D,F,LP) -> walk to spacing -> JP/JK -> Uppercut or Slide (B+LP+LK+BL). Ground Freeze (D,B,LK) is primarily a setup/spacing tool.
LIU KANG - Deep JK -> Flying Kick (F,F,HK). aaHP -> High Fireball (F,F,HP) -> Flying Kick when height permits. Air Fireball = air F,F,HP.
JAX - aaHP -> Energy Wave (half-circle F-to-B,HK). Air-to-air -> Air Back Breaker (BL in air). Ground Pound forces jumps, creating the anti-air opening.
KUNG LAO - aaHP -> Hat Throw (B,F,LP). Jump pursuit -> Dive Kick (air D+HK). Whirlwind (Hold BL: U,U,LK) can catch/launch committed aerial opponents.
REPTILE - Force Ball (B,B,HP+LP) -> advance -> JP/JK -> Slide (B+LP+LK+BL) or Uppercut. Slow Force Ball gives unusually long juggle time.
CAGE - deep JK -> Shadow Kick (B,F,LK); aaHP -> Low Green Ball (D,F,LP). BARAKA - aaHP -> Blade Spark (D,B,HP); corner ender Blade Fury (B,B,B,LP). RAIDEN - deep JK -> Flying Thunder God (B,B,F); aaHP -> Lightning (D,F,LP). SHANG TSUNG - aaHP -> Skull (B,B,HP); 2/3-Skull timing can catch falling opponents.

THE RULE

Launch or stun -> hit high -> land first -> buffer the next attack before they touch the floor. MKII adds stronger launchers and air tools, but the engine is still timing, height and position.
